PROFILE SUMMARY

Skilled software engineer with a strong talent for software design, development, and AI-powered solutions. Experienced in integrating large language models (LLMs) and AI APIs into production applications, and in contributing to AI training workflows including data labeling, prompt engineering, and model evaluation. Certified Google Ads specialist skilled in driving ROI-focused digital marketing strategies.

CORE SKILLS

- **Full-Stack Development:** Laravel, Flutter, Elixir, REST & PostgreSQL
- **Mobile Development:** Cross-platform app development (Android / iOS), published to Google Play Store & Huawei AppGallery
- **Cloud deployment and Infrastructure:** Cloud application deployment, server and infrastructure configuration, containerization, CI/CD pipelines, cloud resource management, monitoring, scalability, and infrastructure automation.
- **AI Integration & Development:** LLM API integration (OpenAI, Claude/Anthropic), prompt engineering, AI-powered feature development
- **Digital Marketing:** Certified Google Ads specialist — campaign management, analytics, ROI optimization
- **Soft Skills:** Excellent written and oral English; strong client requirements gathering and documentation

WORK EXPERIENCE

Software Engineer

May 2026 – Present

Ubuntu Ile' Technologies (Mauritius)

- Design, develop, test, deploy, and maintain scalable web and software applications.
- Develop and integrate RESTful APIs and backend services to support web and mobile applications.
- Build and maintain database-driven applications, ensuring performance, reliability, and data integrity.
- Deploy and manage applications across cloud and server environments, including server configuration, application setup, and infrastructure maintenance.
- Implement software updates, troubleshoot technical issues, and optimize applications for performance and security.
- Collaborate with clients and development teams to gather requirements, design solutions, and deliver technical implementations.
- Integrate third-party APIs and external services into business applications.
- Apply software engineering best practices including version control, testing, debugging, documentation, and secure development.

Full-Stack Engineer

August 2024 – April 2026

Technirvana Solutions Limited

- Integrate AI APIs (OpenAI, Claude) into client-facing web applications to deliver intelligent, automated features
- Build and deploy AI-assisted tools including chatbots, content generators, and automated data pipelines
- Configure, customize, and maintain scalable web platforms and REST APIs
- Manage and optimize Google Ads campaigns; analyze performance metrics and adjust strategy for ROI

- Maintain server security, perform migrations, and manage backup infrastructure
- Gather and translate client requirements into technical specifications and actionable deliverables

Mobile Developer

March 2024 – July 2024

Liana Technologies Limited — Remote

- Developed and published cross-platform mobile applications to Google Play Store and Huawei AppGallery
- Implemented AI-powered features including smart recommendations and natural language input processing
- Wrote comprehensive unit tests to ensure application stability and quality
- Provided technical support and collected client requirements for iterative product improvement

Technical Consultant – Web Applications (Intern)

September 2023 – February 2024

Agile Business Solution Limited

- Developed UI/UX designs from Visio-workflows and translated them into functional web interfaces
- Built and maintained websites; resolved software bugs and optimized performance
- Collaborated with clients to gather requirements and align deliverables with business objectives

EDUCATION

Bachelor of Science — Information Technology

May 2019 – April 2023

Multimedia University

Second Class Honors

Kenya Certificate of Secondary Education

January 2015 – January 2018

Kebulonik High School, Kenya

Mean Grade: B+

KEY ACHIEVEMENTS

- Published 2 mobile applications to Google Play Store and Huawei AppGallery, reaching active user bases
- Designed, created and deployed more than 10 live websites
- Mastered collaborative software development workflows using GitHub across full project life-cycles
- Contributed to flutter development community through publishing 2 flutter packages to pub.dev
- Successfully integrated various payment gateways e.g Paystack, Stripe and M-Pesa payments
- Contributed to AI model training workflows including prompt engineering, data annotation, and model evaluation tasks
- Designed and implemented CRM automation that reduced manual client follow-ups and improved engagement
- Managed a Google Ads campaign that delivered a measurable increase in conversions and client ROI
- Built high-quality UI/UX designs recognized by clients for usability and visual consistency
